

Ted Ma Logistics & A/V Needs

Let's set the stage for success: creating a successful event is in the details. We appreciate your help with the following logistics so we can create a seamless experience for your audience!

Logistics:

| | |
|-----------------------------|---|
| Room Diagram | Please email us a room diagram including stage dimensions if one is available. |
| Agenda | Please email us a copy of the agenda once it is finalized. |
| Social Media Info | Please tag Ted in any relevant posts/photos on social media: @realtedma |
| Arrival On-Site | Ted will arrive on-site 30 minutes before his speaking time, unless otherwise requested. |
| Introduction | Please print the introduction and outro from this page and have the introducer read it verbatim. |
| Book Signing | If book signing is part of our contract, please provide a cocktail table with a chair, tablecloth, post-it notes, and pens. For larger events, provide a staff member to help manage the line for the duration of the book signing. |
| Videographer & Photographer | If you are using a professional videographer and/or photographer, please introduce them to Ted ahead of time or on-site so he can collaborate with them to get the best shots. |

Room Setup & A/V Requirements:

| | |
|-------------------------------|---|
| Tech Check | Please provide a time when Ted can meet with the A/V team before he speaks to test the sound, go through the presentation, and ensure everything is working properly. The day before his presentation works best when possible. |
| Presentation | Ted will bring his PC laptop and a slide advancer. His PowerPoint slide deck includes audio, but no video. He travels with backup copies of his slide deck, just in case. Since he customizes programs up until the last minute, slides are typically not sent ahead of time. |
| Connections | Please provide HDMI cables, a 3.5mm audio cable, and a power outlet for Ted's laptop. |
| Speaker Mic | Ted prefers a wireless lavalier mic. If an over-the-ear mic is being used, please make sure it is a <u>double loop</u> (goes over both ears). |
| Audience Mic & High-Top Table | Ted frequently asks an audience member to join him on stage for an interactive exercise and will need a wireless handheld mic. He typically gives away books during his speech, so please provide a table on or near the stage. |
| Downstage Monitor | Ted prefers to see his PowerPoint slides and notes in "Presenter view" from the stage. Please provide a downstage/confidence monitor. If that isn't possible, Ted will need a high-top table near the stage to see his laptop. |
| Lectern/Podium | Ted moves around a lot on stage. Please remove the lectern/podium from the stage or move it to the back corner so it won't block the audience's view. |
| Wi-Fi Connection | Ted may use live polling in his presentations. If he does, he will need access to a reliable Wi-Fi connection to run the polling software. |
